SAN'IN KAIGAN UNESCO GLOBAL GEOPARK

Information of the exhibition at San'in Kaigan UGG is as follows.

1.Place: Hyogo Prefectural Government, Tajima District Administration Office

Date:13th Oct, 2017

Title:Comprehensive flood control project(display of rainwater storage facility materials)

Overview:In order to measure the reduction of flood damage, Tajima District Administration Office undertaken construction work to install underground storage facilities for temporary storage of rainwater in the underground of the parking lot. On October 13th, we will have an exhibition of rainwater storage facility materials at Tajima District Administration Office.

2.Place : Akaishi, Tchino and Kan'nabe Areas, Toyooka city

Date : 13th Oct, 2017

Title : Field trip for disaster prevention

Field work for disaster prevention of flood and volcanic eruption in the lecture of "Geology" at Tajima Technical Institute.

3 Date and time: From 2015

Location: All over Kyoto Prefecture

Title: "Micro Dragon"

Overview:

Kyoto Prefecture, in order to help disaster prevention against short-term heavy rain frequently occurring in recent years and the utilization of rainwater, we are promoting the installation of a rainwater tank (also known as "micro dragon").

The rainwater tank saves rain that fell on the roof, so as to suppress the rapid increase in waterways etc. Disaster prevention and disaster reduction can be expected.
